

Come

You must initially perform this exercise in the house when it is quiet (no distractions). Put a collar and a six-foot leash on your dog. Slowly step away from your dog (facing him) until you have reached the end of the leash. Drop to your knees and say "COME" once. If he doesn't start to move towards you, give a slight tug on the leash. Once he reaches you, praise his action with a high pitched "GOOD PUPPY". Now, stand up. Repeat this process for several minutes.
