

Follow thru Door

You always want to go through a doorway before your dog. Have a leash and collar on your dog. Walk him up to the doorway and have him sit. Hold your hand out like a traffic policeman while you slowly step backwards through the doorway. Always face him.

Once both of your feet are across the threshold, pat your leg to allow your dog to proceed. Once your dog has crossed the threshold, have him sit again. Praise his action with a high pitched "GOOD PUPPY" for obeying your command.
